Contact?

Specialists in design and manufacture of equipment seats, suspensions, pedestals, arm pads, and seating products for over 30 years.

Supplying the following applications:

CONSTRUCTION
MARINE
SAWMILL
FORKLIFT
CRANE

LOGGING
AGRICULTURE
MINING
MILITARY
TRUCKING

Poor seating choices result in lost time. If an operator fatigues quickly due to discomfort, additional time and money may be wasted.

Seating products should reflect ergonomic considerations, such as varying heights and directions. Replaceable parts are important in extreme conditions, as cushions or other seat parts may wear out before seat frames or bases.
