Located in Canby, Oregon and specializing in machined components for the electronics, medical, food, plastics, and building materials industries. They work with all steels, stainless, aluminum and plastics, producing high quality tooling, fixtures, gages, and short run production parts as well as prototypes and one-off specialty parts, serving the entire United States.

Northwest Machine Works has the most advanced CNC equipment available, as well as many conventional knee mills, engine lathes, and precision grinders with the capability to produce close tolerance parts.

Quality control, customer service, and fast delivery are their highest priorities. Rigid quality techniques, responsiveness, and flexibility to customer requirements provides the ultimate in customer support.

Attention to detail, direct communication and responsiveness to customer needs keeps Northwest Machine Works the supplier of choice.
