Package Containers has been the leader of top quality packaging products for more than 50 years, producing everything a business needs to merchandise their produce.

The Home Toter™ Bag is the ultimate selling tool, not just a cost item for merchandising bulk produce. Plain, stock, and custom bags are available in seven sizes. The Home Toter™ is also useful in deli, fast food, variety, and resale, affordable and easy to carry.

Identi-Ties™ and Skirt Ties™ have become invaluable in today's market place. They are the most economical way to identify and Bar Code/PLU your produce. Skirt Ties also have room for recipes and nutritional information. Both come in stock and custom.

The quality of Package Containers' ties allow for retying and will not split on the re-tie at the store level (which is the most severe test of a produce tie). The key to a quality tie is not how it looks in your hand, but how it will look at the super market level. Our ties will not delaminate from the field to the store and will not rust.
