SMS Auto Fabrics has been in business for more than 25 years and has become the world's largest supplier of original and reproduction fabrics, vinyl, and leathers of American cars from the 1940's through the 1980's. Their warehouses stock over one-half million yards of these original-type materials.

In addition, SMS has the capability to reproduce the beautiful cloth automotive fabrics from the 1950's, 60's and 70's on their own looms; many of which have been unavailable to automobile restorers for years.

To complement these fabrics, SMS Auto Fabrics has developed the expertise to remake almost all automotive vinyl and leather in their correct original color and grain. Their ability to supply cloth, leather and vinyl for any automobile is unparalleled in the restoration industry. Along with the fabric, vinyl, and leather, SMS leads the market in manufacture of interior door trim panels for 50's and 60's cars and has the capability to custom-make panels for virtually all 50's and 60's American cars, from convertibles to sedans, to station wagons, they can do them all. The machinery used to make door panels can also be used to make the heat-stamped vinyl embossing often found on seats in 50's and 60's cars. By reproducing these vinyl seat sections in an economical manner, they are able to offer the automobile restorer a "finishing touch" that was never before available.

Whatever your automotive interior restoration problems, SMS Auto fabrics has your solution.
